

## Why Do Doctors Rely on the Memory & Attention Center?

### Speed...

We usually schedule a patient within two weeks of referral. If urgent, testing can be completed in as little as 24 hours.

### Cost...

Evaluations are typically paid by Medicare, and any "co-payment" is generally covered by Medex, AARP, and other secondary insurances.

### Reliability ...

A psychologist conducts all testing. All medical exams are supervised by a geropsychiatrist. The evaluation is fast and easily tolerated by seniors, even those with medical problems.

### Convenience ...

We have locations throughout Southeastern Massachusetts and in the Worcester area. Our base locations (where labs and scans are performed) are at well known hospital centers. We often travel to patients' homes when needed, including Nantucket and Martha's Vineyard.

### Professionals You Can Trust...

The Center's staff, includes geropsychiatrists, social workers, geropsychologists, occupational therapists, neuropsychologists and advanced practice nurses. We specialize in working with seniors and have affiliations with four inpatient geropsychiatric hospitals serving Southeastern Massachusetts.

#### Base Locations:

- Caritas Good Samaritan Medical Center in Brockton
- Caritas Carney Hospital in Dorchester

#### Satellite Locations:

Plymouth, Hyannis, Falmouth
